

PREFACE

Alias Abdul Rahman

Universiti Teknologi Malaysia, Malaysia, alias@utm.my

First of all, I would like to thank all the reviewers who have provided useful comments, views and suggestions to the papers or abstracts assigned to them. Some reviewers were assigned with more than 5 papers. We really appreciate their commitments. This year submissions were focussed on several disciplines such as 3D GIS, GPS, remote sensing, UAV, GIS, and other areas. One hundred and twenty two (122) submissions were received from prospective authors who came from more than 30 countries. All papers were thoroughly reviewed and evaluated which then categorised into oral or short presentations (with poster). All accepted oral and poster papers are published as International Society for Photogrammetry and Remote Sensing (ISPRS) Archives and indexed by Scopus. Finally, I hope these papers would trigger new interesting ideas for more advanced research in geomatics and geospatial domain in the near-future.

Professor Dr. Alias Abdul Rahman,
Chair GGT 2019
